

## PORTABLE PIZZA OVEN

**99**  
lbs

**10 min**  
heat up

**90 sec**  
cook time

**26.8"**  
deep cooking

The oven weighs 55lbs and the (removable) refractory brick tiles that go on the oven's floor weigh 44lbs.

### COMPONENTS OF THE OVEN:

- Wildfire Portable Pizza Oven (registered design in Portugal and Europe)
- Door 500 x 8.3in x 0.9in
- Removable Chimney with cap and butterfly valve
- Removable 18 Refractory tiles 7.9in x 4in x 1.2in

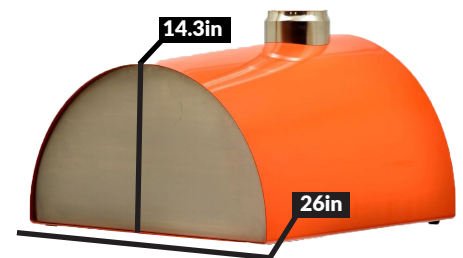

**Available colours:** red, black, blue, green, gold, purple, bronze, charcoal grey

The oven is entirely laser cut and all part are welded with stainless steel. It's interior is 100% made in stainless steel 304 as well as it's front and back panels.

The outside is made in 0.05in aluminum and can be painted in different colours.

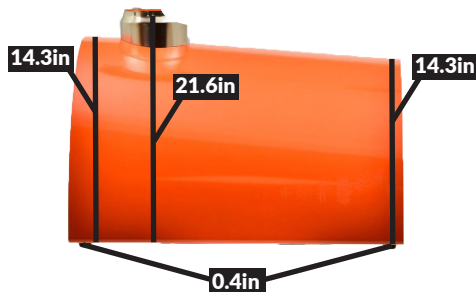

Between the interior and exterior walls of the oven, top, bottom and sides, there's a ceramic fibre blanket to achieve optimum insulation.

The door is made in stainless steel 304, with a handle and 6 holes of 0.8in, 3 on each side.

Interior Measures

Exterior Measures

The Wildfire Portable Pizza Oven is packed in a double cardboard box, strapped to a wooden pallet on the bottom.
